# CLEARLY DIFFERENT

All filtration coolers are NOT the same. The Wellsys water cooler's filtration system is in a class by itself. This cooler delivers the purity and the protection you need.

## Here's what the system provides:

- **Advanced Sanitization:** Activated oxygen is the fastest and healthiest way to kill bacteria.
- **Pure-Touch Dispense:** Continuous sanitization dispensing system eliminates the transfer of bacteria caused by hands, cups, and bottles that touch the dispensing nozzle.
- **Environmentally friendly and taller design** for a comfortable dispense height.
- **Superior Purification Process:** 7-Stage filtration addresses lead (essential for Capitol Hill), chlorine, odors, and organic and inorganic compounds while adding minerals and electrolytes.
- **Water on Demand:** Touch the sensor for cold and hot water on demand.
- **Enhanced Nutrients:** Enhances alkalinity and includes a nutrient boost from added minerals.
- **No Hidden Pricing:** Your monthly price includes annual filter(s) change and any necessary tech support.
